Work experience

Expert Java Developer / Roche

05.2020 – Current

In Roche I am responsible for developing the internal platform for creating data format specifications between Roche and external laboratories, validating data uploaded by external vendors and creating reports based on these data.

Key technologies: Java 8/11/17, Kotlin, Spock, Spring Boot 2, MongoDB, GCP PubSub

Senior Java Developer / HRS

03.2019 – 04.2020

In HRS I was responsible for developing components of the search and booking system such as the payments module, web portal, and configuration portal.

Key technologies: Java 6/8/11, Spock, Spring Boot 2, AWS

Senior Java Developer / Roche

10.2018 – 02.2019

In Roche I was responsible for developing a system for hospitals to make easier the collaboration between medical doctors and their patients.

Key technologies: Java 8, Spring Boot 2, AWS

Java Developer / Netcompany

02.2018 – 09.2018

In Netcompany I was developing a system used to manage insurance for unemployment people in Denmark.

Key technologies: Java 8, Spring Boot

Java Developer / EY

06.2016 – 01.2018

In EY I worked on two projects: one was ETL migration in the Belgian insurance company and the second was implementing a solution based on a Guidewire suit for another Belgian insurance company.

Key technologies: Gosu, SQL, Java 8, Spring Boot

Fullstack Developer / EY

03.2013 – 12.2015

In Accenture I participated in three projects: as an ETL developer in a post-merge project in a Polish bank, as a full stack developer in the project developing platform for reporting claims for the insurance company, and as a front-end developer in the project developing CRM for big Polish bank

Key technologies: Java 7, Javascript, SQL

Education

Computer science, MSc
